

**RTWD**

## Water-Cooled Screw Chillers and Water/Water Heat Pumps

Model RTWD (R134a)  
240 - 1005 kW  
Model RTWD G (R1234ze)  
365 - 815 kW

**TRANE**  
TECHNOLOGIES

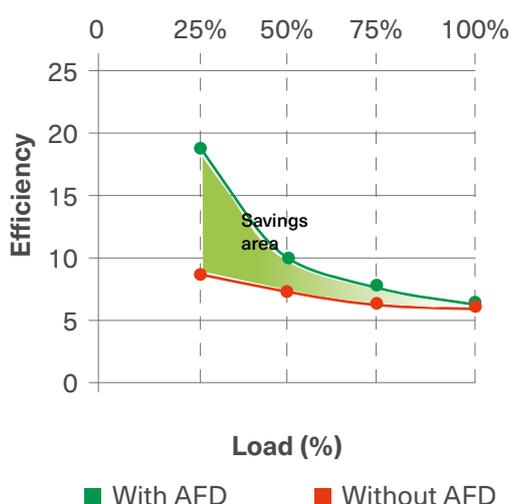

# A Sustainable HVAC Solution with Unmatched Levels of Performance, Comfort and Economy

High performance buildings need high performance, sustainable HVAC systems. Your buildings need to be supremely energy efficient, today, tomorrow and long into the future. A Trane RTWD chiller provides reliable and dependable performance to ensure continuous delivery of precise temperature control across the full spectrum of demanding comfort and industrial applications.

This model RTWD is available with a choice of refrigerants: R134a or R1234ze which has a GWP value of less than one to exceed current F-Gas legislation requirements and help customers reduce carbon dioxide (CO<sub>2</sub>) emissions and achieve extreme part load and full load efficiencies.

## Energy efficiency

To reach the highest standards of efficiency, Trane has more than 100 years of engineering expertise, world leading research and the most rigorous testing. As a result, the RTWD chiller achieves market-leading EER (Energy Efficiency Ratio) and ESEER (European Seasonal Energy Efficiency Ratio).

## Versatility

Whether your building requires comfort cooling or precision temperature control as part of a sensitive industrial process, Trane offers suitable RTWD models.

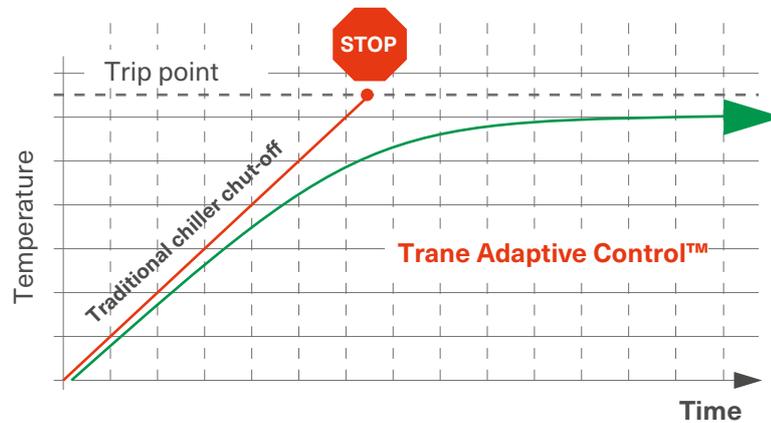

## Minimized total cost of ownership

Energy costs are minimized by optimizing efficiency. Maintenance costs are reduced as a result of effective performance and alarm monitoring linked to equipment with proven dependability. Installation costs are lower thanks to design improvements which reduce the time required for new plants or upgrades. An Adaptive Frequency™ Drive, available with the top of the range RTWD High Seasonal Efficiency model, reduces energy consumption even further by improving your chiller's efficiency under reduced load conditions.

## Trane exceptional reliability

Your facility depends on a reliable HVAC system for employee comfort and well-being as well as for critical process applications. Trane reliability is based on over 100 years of designing, testing, installing and maintaining chillers around the world. Every Trane product guarantees that unique heritage and the pride we have in being the best at what we do.

# Leading Control Technology Trane Adaptive Control™: Tracer® CH530

## Driving Reduced Energy Consumption

Developing our own control algorithm and software is one of our unique strengths. Trane does not just use a controller from a vendor and adapt it to its units. We take the matter a step further and develop the unit from the beginning.

### Patented control algorithms

- The Tracer™ CH530 provides the intelligence behind the RTWD chiller and features Adaptive Control algorithms: proprietary control strategies that respond to a variety of conditions to maintain efficient operation
- Total chiller control through continuous monitoring

### Visibility

- Full system status at a glance
- Clear display of key operating parameters

### Ease of use

- The display shows key operating parameters and allows quick access to critical data

- Intuitive navigation allows quick access to critical data
- Main processor in the control panel

### Operational effectiveness

- Data trending
- Clear alarm log enables fast response and rapid resolution
- Adaptive Control algorithms preempt chiller disruption

A leading combination: the proven Tracer Adaptive Control™ Controller and the easy-to-use interface.

# The Future of F-Gases

The fluorinated refrigerants phase-down, as defined in the new EU F-Gas Regulation, is a step-by-step approach where the quantities of HFCs expressed in CO<sub>2</sub> equivalent that are placed on the market are gradually reduced. As a result of the phase-down, HFC consumption will be reduced by 79% by 2030.

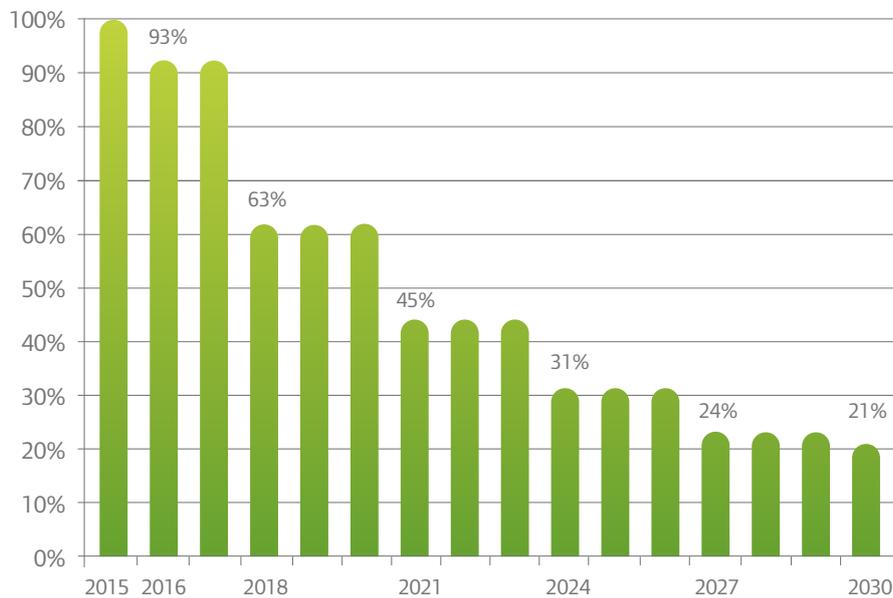

This is an unprecedented reduction and means that industry and users need to make, over time, the

transition to refrigerants with a lower global warming potential.

Trane, recognized as a leading innovator in the HVAC industry, introduces this new, next generation, lower GWP refrigerant in Sintesis and other products to be front running in the marketplace and to support your strong sustainability objectives.

Trane - provider of sustainable solutions.

## HFC consumption

Baseline value (100%) is the annual average of total quantity of CO<sub>2</sub> equivalents placed on the EU market from 2009 to 2012.

# An environmentally sustainable solution

## EcoWise™

RTWD chillers and heat pumps with low GWP refrigerants are part of the EcoWise™ portfolio of products that are designed to lower their environmental impact with next-generation, low global warming potential (GWP) refrigerants and high-efficiency operation.

### New R1234ze

Ozone depletion potential = 0

Low global warming potential (GWP<1)

Refrigerant	Global Warming Potential (GWP)
R410A	1924
R407C	1774
R134a	1300
R513A	572
R1233zd	1
R1234ze	<1

### What is GWP?

GWP is the global warming impact relative to the impact of the same quantity of carbon dioxide over a 100 year period.

### What is ODP?

Ozone depletion potential of a chemical is the amount of degradation to the ozone layer it can cause.

## Easier to use

### Trane AdaptiView™ CH530

The control comprises a LCD display for user-friendly monitoring at the local level and various communication interfaces (LonTalk®, BACnet® and Modbus) for easy integration into a BMS.

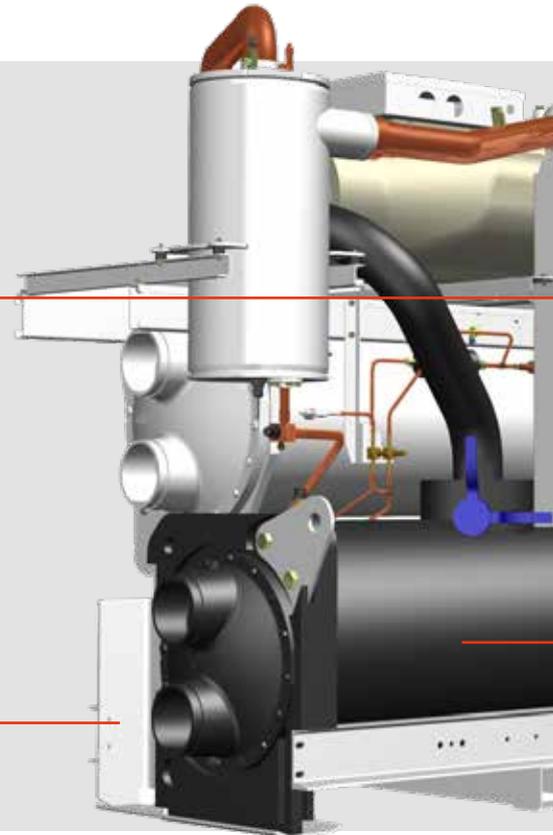

LONMARK®  
SPONSOR

## Two different refrigerant alternatives

R134a and R1234ze with GWP<1

## Proven Trane reliability

- Trane design simplicity
- Trane direct drive, low speed, semi-hermetic compressor with only 3 moving parts
- Infinite unloading for exact load matching
- RTWD uses system differential to move oil, not an oil pump, meaning no extra moving parts to wear out or break down

## Trane RTWD is also a water-to-water heat pump

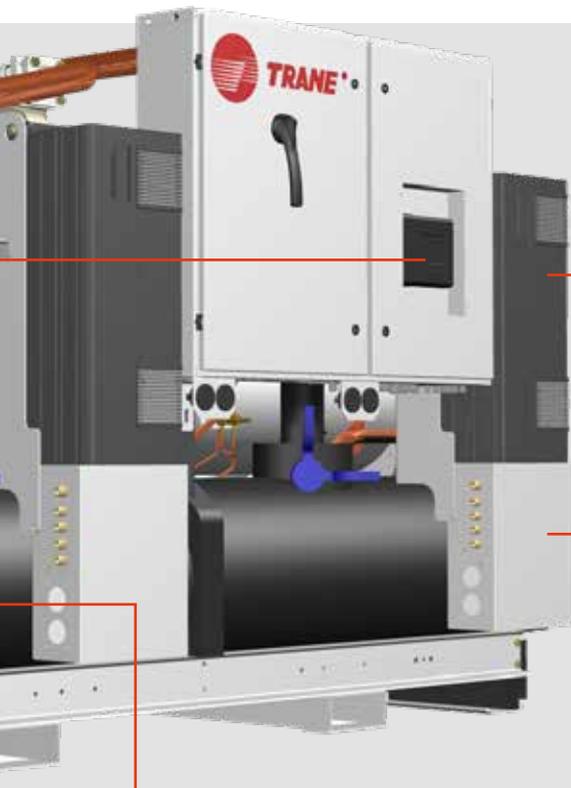

- Perfectly addresses the market needs for most heat pump applications, including geothermal applications.
- Able to produce hot water up to 63°C with RTWD and 75°C with RTWD G
- High level of performances (COP up to 4.8 at 45°C)
- Units below 400 kW are compliant with Ecodesign regulation for heat pumps.

### Easier to install

- All versions and sizes fit through standard 2 meter wide doors
- Only one water connection on the condenser (inlet/outlet)
- Only one electrical connection (single point) as standard
- Saves time, saves costs

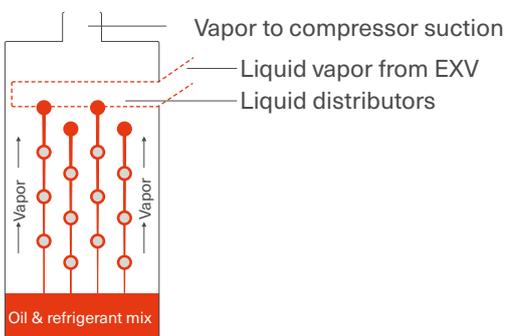

### Increased savings with HSE (High Seasonal Efficiency) version

- AFD (Adaptive Frequency™ Drive) as standard
- Fewer start-stop cycles
- Increased compressor life
- Reduced start-up current draw
- Turning your current RTWD into a top performing chiller is possible thanks to Trane Field Retrofit solution

### Maximum efficiency

- Patented Trane Falling Film Evaporator
- Industry leading efficiency
- Reduces energy bills

### Prepared for the future

In reply to the rise of energy consumption concerns and the need to closely monitor installations, Trane has integrated a special “Power Meter” function that lets you see exactly how much power the compressor is consuming.

# General specifications

## Operating limits

		RTWD (R134a)	RTWD G (R1234ze)
Condenser leaving water temperature (min/max)	(°C)	+14 / +63	+14 / +75
Evaporator leaving water temperature (min/max)	(°C)	-12 / +18	-12 / +20
Power supply	(V/Ph/Hz)	400/3/50	

## General Data for cooling performances

## RTWD Extra Efficiency (XE)

Unit Size		160 XE	180 XE	200 XE
<b>Air Conditioning (1)</b>				
Net Heating Capacity (2)	(kW)	668.0	736.6	794.5
Net COP (2)		4.76	4.73	4.72
<b>Low Temperature Heating (3)</b>				
Net Heating Capacity (2)	(kW)	693.9	763.7	820.5
Net COP (2)		5.46	5.34	5.34
SCOP(4)		5.48	5.38	5.52
Space Heating efficiency $\eta_{s,h}$ (4)	(%)	211	207	213

## RTWD High Seasonal Efficiency (HSE)

Unit Size		060 HSE	070 HSE	080 HSE	090 HSE	100 HSE	110 HSE	120 HSE
<b>Air Conditioning (1)</b>								
Net Heating Capacity (2)	(kW)	270.2	317.6	367.3	423.3	451.0	481.4	520.7
Net COP (2)		4.42	4.40	4.35	4.40	4.42	4.47	4.49
<b>Low Temperature Heating (3)</b>								
Net Heating Capacity (2)	(kW)	281.4	330.9	381.0	438.1	468.2	500.7	536.8
Net COP (2)		4.96	4.88	4.84	4.87	4.91	4.98	5.12
SCOP(4)		5.55	5.19	4.96	4.96	4.97	5.00	5.16
Space Heating efficiency $\eta_{s,h}$ (4)	(%)	214	200	191	190	191	192	198

## RTWD High Seasonal Efficiency (HSE)

Unit Size		130 HSE	140 HSE	160 HSE	180 HSE	200 HSE	220 HSE	250 HSE	260 HSE	270 HSE
<b>Air Conditioning (1)</b>										
Net Heating Capacity (2)	(kW)	560.0	609.3	674.6	741.9	798.2	869.5	945.3	1049.6	1139.8
Net COP (2)		4.50	4.52	4.70	4.60	4.54	4.44	4.49	4.24	4.29
<b>Low Temperature Heating (3)</b>										
Net Heating Capacity (2)	(kW)	572.5	627.6	701.6	772.2	829.8	899.8	977.6	1059.3	1150.6
Net COP (2)		5.25	5.2	5.29	5.28	5.34	5.14	5.15	4.89	4.9
SCOP(4)		5.30	5.29	5.35	5.47	5.82	5.23	5.43	4.99	4.98
Space Heating efficiency $\eta_{s,h}$ (4)	(%)	204	204	206	211	225	201	209	192	191

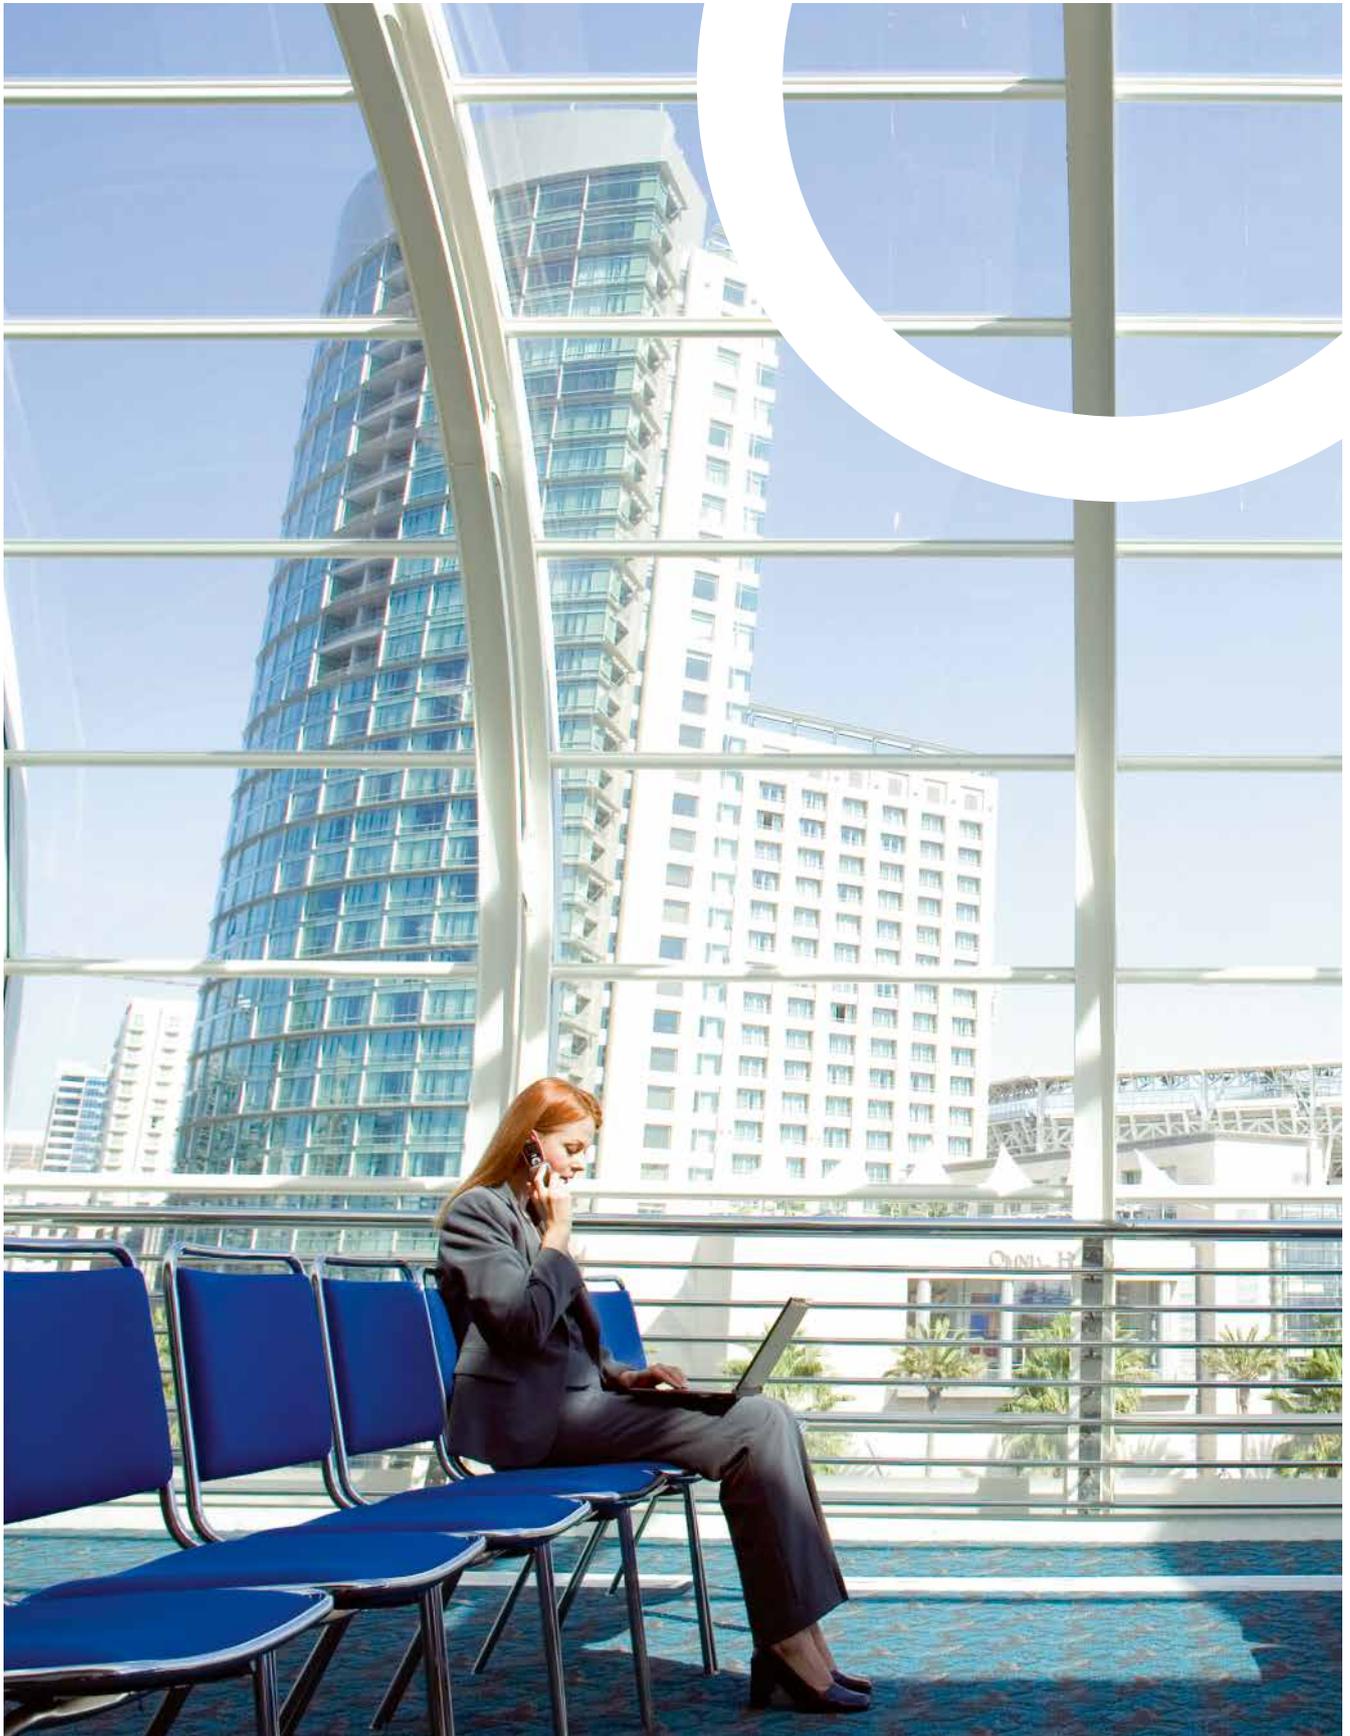

(1) At 40/45°C Entering/Leaving Condenser and 10/7°C Entering/Leaving Evaporator

(2) Net performances calculated as per EN 14511-2013.

(3) At 30/35°C Entering/Leaving Condenser and 10/7°C Entering/Leaving Evaporator

(4)  $\eta_{s,h}$  / SCOP as defined in Directive 2009/125/EC of the European Parliament and of the Council with regard to Ecodesign requirements for space heaters with 400 kW maximum rated capacity - COMMISSION REGULATION (EU) N° 813/2013/EU of 2 August 2013

(5) At 47/55°C Entering/Leaving Condenser and 10/7°C Entering/Leaving Evaporator

Space Heating efficiency $\eta_{s,h}$ (4)	(%)	183	180	182	181	180

(1) At 40/45°C Entering/Leaving Condenser and 10/7°C Entering/Leaving Evaporator

(2) Net performances calculated as per EN 14511-2013.

(3) At 30/35°C Entering/Leaving Condenser and 10/7°C Entering/Leaving Evaporator

(4)  $\eta_{s,h}$  / SCOP as defined in Directive 2009/125/EC of the European Parliament and of the Council with regard to Ecodesign requirements for space heaters with 400 kW maximum rated capacity - COMMISSION REGULATION (EU) N° 813/2013/EU of 2 August 2013

(5) At 47/55°C Entering/Leaving Condenser and 10/7°C Entering/Leaving Evaporator

## The Trane advantage

Trane is recognized as a world leader with over **100 years of experience** in creating and sustaining safe, comfortable and energy efficient environments while improving the performance of buildings and processes around the world.

Trane innovative solutions optimize indoor environments with the **broadest portfolio** of energy efficient heating, ventilating and air conditioning systems, building services, parts support and advanced controls in the industry.

To ensure your equipment continues to work at its optimum, throughout the life of the building, Trane provides a full range of service solutions, combined with in-house expertise and the **most extensive service and support network** in the industry.

And with Trane's **extensive rental fleet** all your temporary cooling and heating needs are served: we provide continuous cooling or heating during equipment changeouts or supplemental supply for those times when your cooling loads exceed your current system's capacity. For more information: [www.trane-chiller-rental.eu](http://www.trane-chiller-rental.eu)

Trane – by Trane Technologies (NYSE: TT), a global climate innovator – creates comfortable, energy efficient indoor environments through a broad portfolio of heating, ventilating and air conditioning systems and controls, services, parts and supply. For more information, please visit [trane.eu](http://trane.eu) or [tranetechnologies.com](http://tranetechnologies.com).
